

A structured and scalable GIS for your organisation

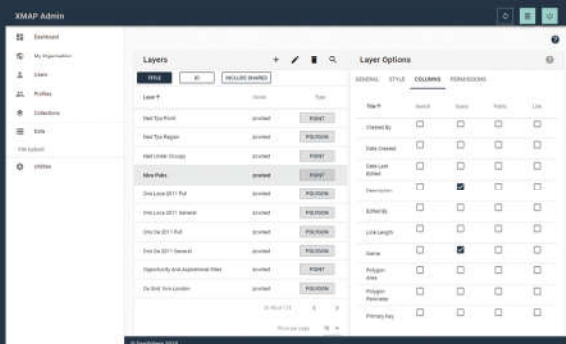

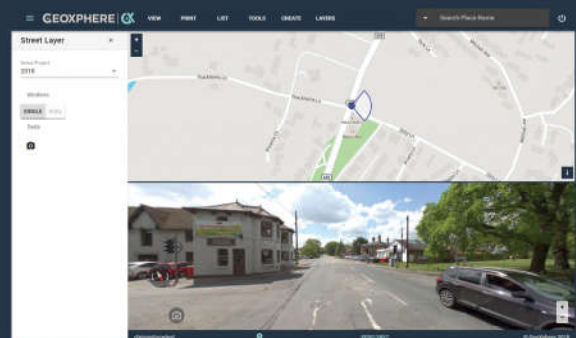

XMAP gives everyone access to digital mapping and analysis tools

Why use XMAP?

DATA. With XMAP you can upload and maintain your geospatial data and share it with colleagues, external teams and customers.

SIMPLICITY. XMAP isn't as complex as QGIS or ESRI software, but that's the beauty of it! It has a structured layout with key GIS tools.

CONTROL. The Admin Dashboard gives you complete control over usage, editing, styling and branding. This makes it suitable as a full-blown corporate GIS.

PRICE. We tailor your subscription to fit your business model, usage and, importantly, budget.
